                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   pooled lung tumor tissue, and was then primed with a Not I oligo(dT) primer. Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and coloned into the Not I and Eco RI sites of the modified pTTT3 vector. Library went through one round of normalization. Library constructed by Bento Soares and M. Fatima Bonaldo. "

pooled lung tunnor tissue, and was then primed with a lot I oligo (dT) primer. Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and Coloned into the Not I and Eco RI sites of the modified pTTT vector. Library went through one round of normalization. Library constructed by Bento Soares and M. Patima Bonaldo. "
